

# INNOVATIVE ALUMINIUM SOLUTIONS

Increased payload

Full aluminium tray deck construction

Improved fuel economy

Long term durability

## HEAVY DUTY 4X4 SOLUTIONS

From work to play **Duralloy** have designed and manufactured a wide range of custom aluminium truck bodies to suit 4WD vehicles and off-road applications.

Through the use of aluminium, we have minimised tray weight and maximised payload allowing for increased carrying capacity, improved fuel economy and overall long-term durability. With no need for regular maintenance or painting our rust-free tray solutions are ideal for any environment.

Our flexible tray design and fully customisable aluminium solutions allow us to build truck bodies to suit our customers exact specifications.
